Our commitment: Identifying the best solution for your project and enabling you to become your customers' first choice!

AMS Technologies is a leading solution provider and distributor of high-tech, leading-edge components, systems and equipment, with more than 30 years of experience and serving more than 2000 European customers.

With an appropriate technical education, an element of entrepreneurial spirit and many years of design and consultancy expertise, our engineers can rapidly comprehend system requirements and provide you the customer with a solution that goes way beyond a simple understanding of our product datasheets.

We take active involvement in the design cycle, defining and re-defining your specifications leading in many cases to highly specific, customized products and solutions.

Helping you to effectively outsource your production line, we can even provide you with the necessary leading turnkey contract manufacturing services in our key competency fields.

We thrive by working in a 'customer first' environment. Our pan-European customers are serviced from a network of local offices in Germany, UK, France, Italy, Spain, Poland and Sweden, with a focused operations and logistics centre located in Munich, Germany. Our design center in Krakow Poland offers prototyping capabilities as well as subcontracting for volume production management.

AMS Technologies – access to leading technologies in ...

Power Technologies

Our portfolio of Power Technologies is focused around components and systems for high voltage and high frequency applications. From active to passive components, integrated drivers and converters up to large 100kW power supplies, we can provide the right products for demanding applications.

Optical Technologies

The product area of Optical Technologies encompasses a huge range, from the smallest lenses to the largest laser systems. Based on our longstanding expertise and a strong network of technology partners we can realize and provide custom component designs for OEM customers as well as complete system solutions for research, scientific and industrial customers.

Thermal Management

Our Thermal Management team focuses on controlling the temperature of electronics, photonics and analytical applications. From air to liquid cooling, from vapor compression to Thermoelectrics and from components to entire system, we have access to the technologies needed and the deep knowledge of how to apply them.

AMS Technologies – enabling your ideas.

We want to accelerate your success, which is why AMS Technologies has invested in a design center in Krakow, Poland. Our goal is to augment your team's key competencies by providing engineering services that are not core to you or where you may struggle with available resources to finish your projects.

From Design Services to Prototype Development to complete Turn Key Solutions, our collaborative approach has already helped many customer projects to move from concept to production.

A circular porthole in a concrete wall looking out onto a body of water. The porthole is set into a grey, textured concrete wall. The view through the porthole shows a bright, overexposed outdoor scene with a body of water and a distant shoreline. The text "from technology components to turnkey solutions." is overlaid on the white circular area of the porthole.
